

## Service Plans designed by South-Tek Experts that Control Costs, Protect Performance, Ensure Ongoing Reliability

Your system's reliability depends on the strength of its support. Our service plans are designed to protect performance, efficiency, and up-time year after year.

---

### Why a fixed-term Service Plan?

#### Maximum Reliability & Uptime:

- Scheduled preventative maintenance reduces unplanned downtime
- Maintains consistent system performance
- Allows early detection of wear on critical components before failures occur

#### Predictable, Controlled Costs:

- Reduced risk of costly system failures, including emergency parts, expedited shipping, and lost production
- Fixed pricing over the life of the plan
- Protection against labor rate increases & inflation

#### Extended Equipment Life:

- Safeguard high-value assets
- Protect sensitive components by maintaining proper air & nitrogen quality
- Reduce stress on downstream components, minimizing catastrophic failures

---

### Operational & Safety Advantages:

- Priority service scheduling
- Factory-trained technicians familiar with your equipment
- Documented maintenance records for audits, compliance, and EHS programs
- Support for maintaining OEM warranty and certification requirements

## What's Included:

### **Preventative Maintenance & Inspections –**

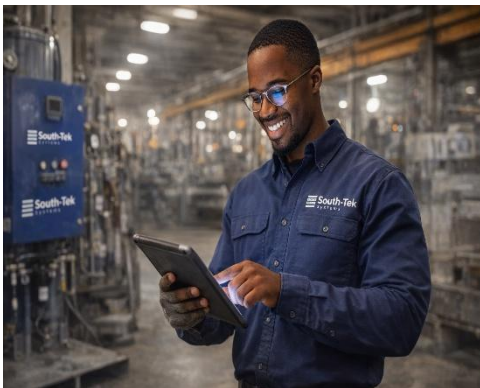

Replacement of consumables with manufacturer-approved parts and lubricants, comprehensive system inspections, and evaluation of seals, valves, and wear components to ensure long-term reliability.

### **Performance Verification & Optimization –**

System-level verification of air and nitrogen performance, including operating pressures, flow rates, purity requirements, and control logic to support consistent, optimized operation.

**Certified Technical Support & Risk Management** – Factory-certified service for critical components and proactive risk mitigation to reduce safety, reliability, and operational incidents.

**Operator Training & Operational Support** – Ongoing training and guidance to reinforce proper system use, routine maintenance best practices, troubleshooting, and early issue detection.

## **The Bottom Line:**

Customers with service plans benefit from:

- Improved system reliability
- Lower total cost of ownership
- Budget certainty and operational continuity
- Plan duration to suit your business (12-60 months, or longer)
- Peace of mind knowing critical nitrogen-systems are protected

## **Interested?**

We'll customize a plan based on your system configuration, usage, and operational requirements.
